

## ACKNOWLEDGMENTS

This Draft Comprehensive Wastewater Management Plan and Draft Environmental Impact Report was produced through the joint efforts of Stearns & Wheeler and the Town of Chatham. Stearns & Wheeler appreciates the assistance and valuable contributions made by the Comprehensive Wastewater Management Plan Citizens Advisory Committee (CAC) and Technical Advisory Group (TAG) who attended many meetings and provided valuable insight on the wastewater issues being experienced and discussed by the Town of Chatham. We also want to thank the staff of the Town of Chatham, Department of Health and Environment, Water and Sewer Department, and Assessing Department who provided much Town data that was used in this project. We would like to acknowledge the following individuals who greatly contributed to this report and study.

**Robert A. Duncanson, Ph.D.** of the Chatham Health and Environment Department who provided much information on the Town's surface and groundwater quality, potential build out conditions in Town, and previous environmental studies performed for the Town, as well as providing overall guidance for the Town's TAG.

**William G. Redfield, P.E.** of the Water and Sewer Department who answered many questions, and provided project background on the Town's water and wastewater system.

**Mike Keller** of Earth Tech, Inc. (Operator of Chatham Wastewater Treatment Facility {WWTF}) who provided much operations data and insight on the Chatham WWTF.

We would also like to acknowledge the efforts of the Cape Cod Commission, the Massachusetts Department of Environmental Protection, and the University of Massachusetts School of Marine Science and Technology who provided additional studies and data on the Towns water resources.
