

## NOTE TO READERS

This Draft Comprehensive Wastewater Management Plan and Draft Environmental Impact Report has been divided into several volumes due to the large quantity of information compiled as part of the Comprehensive Wastewater Management Planning Process over the past 12 years.

Please note that **FIGURES** and **TABLES** are included in **Volume 2** of this document. Figures and Tables are referenced by their related Chapter number and order they appear in that chapter, for example “Figure 10-7” refers to the seventh figure within Chapter 10. The same format is used for Tables.

Please note that due to the size of the Appendices, and in an effort to reduce the amount of paper used, the Appendices have been included on compact disk(s) at the end of Volume 2 of this document. If the reader elects to print the entire Appendix it has been divided into two “Volumes” for convenience.
