TOWN OF CHATHAM
WATER DEPARTMENT

Application for registration of irrigation systems connected to the Public Water System.

1. Location of irrigation system connected to the Public Water System.

Name: _____ Amount Paid: _____

Street: _____ Check No: _____

Water Account Number: _____ Date: _____

2. Attach drawing of the irrigation system's layout showing building(s), septage system, driveway(s), road(s), and the connection to the Public Water System, and location of the backflow prevention device and rain sensor.
3. Is the system installed with a testable back-flow prevention device? Yes No
   Attach a drawing and specification of the existing back-flow prevention device.
   A testable back-flow prevention device is required on all systems.
   If a back-flow prevention device is not currently installed on your system the Water Department will perform a survey and establish the type of device required.
4. Is the Irrigation System equipped with pesticides, fertilizer, and/or herbicide dispensing device(s)? Yes No
5. Is the system equipped with a timing device? Yes No
6. Is the system equipped with a rain sensor? Yes No

PRIVATE WELLS SHALL NOT BE CONNECTED TO ANY IRRIGATIONS SYSTEMS THAT ARE OR WILL BE CONNECTED TO THE PUBLIC WATER SUPPLY.
As stated in the "Town of Chatham, Rules and Regulations of the Water Department," the undersigned agrees to provide access to all authorized agents of the Water Department at reasonable hours for inspection of the irrigation system and testing of the backflow prevention device.

The registration fee for new and existing irrigation systems is $50.00.
